Content-Based Image and Video Retrieval (Multimedia Systems and Applications) Oge Marques, Borko Furht

Content-Based Image And Video Retrieval addresses the basic concepts and techniques for designing content-based image and video retrieval systems. It also discusses a variety of design choices for the key components of these systems. This book gives a comprehensive survey of the content-based image retrieval systems, including several content-based video retrieval systems. The survey includes both research and commercial content-based retrieval systems. **Content-Based Image And Video Retrieval** includes pointers to two hundred representative bibliographic references on this field, ranging from survey papers to descriptions of recent work in the area, entire books and more than seventy websites. Finally, the book presents a detailed case study of designing MUSE–a content-based image retrieval system developed at Florida Atlantic University in Boca Raton, Florida.

From reader reviews:

Richard Glass:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim or maybe goal; it means that guide has different type. Some people sense enjoy to spend their time to read a book. They can be reading whatever they get because their hobby is usually reading a book. Consider the person who don't like looking at a book? Sometime, man feel need book after they found difficult problem or maybe exercise. Well, probably you should have this Content-Based Image and Video Retrieval (Multimedia Systems and Applications).

Janice Martin:

This Content-Based Image and Video Retrieval (Multimedia Systems and Applications) is great publication for you because the content and that is full of information for you who also always deal with world and get to make decision every minute. This specific book reveal it data accurately using great coordinate word or we can state no rambling sentences included. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but challenging core information with beautiful delivering sentences. Having Content-Based Image and Video Retrieval (Multimedia Systems and Applications) in your hand like finding the world in your arm, information in it is not ridiculous one. We can say that no book that offer you world within ten or fifteen small right but this reserve already do that. So , this can be good reading book. Heya Mr. and Mrs. busy do you still doubt in which?

Irene Howe:

Many people spending their time by playing outside along with friends, fun activity together with family or just watching TV the whole day. You can have new activity to shell out your whole day by reading through a book. Ugh, ya think reading a book can actually hard because you have to accept the book everywhere? It all right you can have the e-book, bringing everywhere you want in your Mobile phone. Like Content-Based Image and Video Retrieval (Multimedia Systems and Applications) which is having the e-book version. So , try out this book? Let's see.

Jon Estrada:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library or even make summary for some publication, they are complained. Just small students that has reading's internal or real their pastime. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Content-Based Image and Video Retrieval (Multimedia Systems and Applications) can

make you feel more interested to read.
