Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) Manuel de Vega, Margaret Jean Intons-Peterson, Philip N. Johnson-Laird, Michel Denis, Marc Marschark

This second volume in the Counterpoints Series, which explores issues in psychology, child development, linguistics, and neuroscience, focuses on alternative models of visual-spatial processing in human cognition. This text offers extended chapters from three of the most respected and recognized investigators in the field: Michel Denis, Margaret Intons-Peterson, and Philip Johnson-Laird. Denis considers the role of mental imagery in spatial cognition and topographical orientation; images are viewed as a form of mental representation that is similar to real-world objects. Intons-Peterson examines spatial representation in short-term, or working-memory, considering the relationship of visual-spatial processes to subjects' expectations and individual differences. Johnson-Laird approaches the issue of visual-spatial representation from a "mental models" perspective, considering the relationship of images to various cognitive events. The editors provide a historical and theoretical introduction; and a final chapter integrates the arguments of the chapters, offering ideas about new directions and new research designs.

From reader reviews:

Kim Bartlett:

Have you spare time for the day? What do you do when you have more or little spare time? Yep, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a move, shopping, or went to the actual Mall. How about open or perhaps read a book allowed Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language)? Maybe it is to be best activity for you. You know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with its opinion or you have various other opinion?

Wilhelmina Kane:

Nowadays reading books are more than want or need but also become a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with knowledge books but if you want experience happy read one together with theme for entertaining like comic or novel. The particular Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) is kind of e-book which is giving the reader capricious experience.

Joyce McDonald:

This Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) is great reserve for you because the content which can be full of information for you who else always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great organize word or we can say no rambling sentences inside. So if you are read it hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but challenging core information with attractive delivering sentences. Having Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) in your hand like keeping the world in your arm, info in it is not ridiculous a single. We can say that no guide that offer you world within ten or fifteen tiny right but this reserve already do that. So , this can be good reading book. Hey there Mr. and Mrs. active do you still doubt in which?

Cherry Simard:

Do you like reading a guide? Confuse to looking for your selected book? Or your book had been rare? Why so many question for the book? But any kind of people feel that they enjoy with regard to reading. Some people likes studying, not only science book but in addition novel and Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) or others sources were given knowledge for you. After you know how the truly amazing a book, you feel would like to read more and more. Science publication was created for teacher or perhaps students especially. Those publications are helping them to add their

knowledge. In some other case, beside science publication, any other book likes Models of Visuospatial Cognition (Counterpoints: Cognition, Memory, and Language) to make your spare time considerably more colorful. Many types of book like this one.
