Student Manual for the Art of Electronics

Thomas C. And Horowitz, Paul Hayes

Student Manual for the Art of Electronics Thomas C. And Horowitz, Paul Hayes

This manual satisfies two needs for students and teachers using the art of electronics as a text: " it sets forth 23 laboratory exercises that can form the backbone of a one- or two-semester course in electronics, both analog and digital" it supplements the text s explanations of selected topics which have been chosen for their importance to a student, rather than a practitioner who uses the text as a reference. The manual is a product of many years teaching at harvard university, where the authors have tested and refined both lab exercises and explanations. The result is a set of course materials tailored to students needs, moving quickly where appropriate and slowly on those concepts that students have found most difficult.
