I am tired of relying on pharmaceuticals and chemicals to deal with every day common illness, from a cold to a headache to high blood pressure. Every medication we use, **no matter how common or well-researched, comes with intended and unintended effects.** Some of these effects, such as the intended effects, are desired, like pain relief when taking pain relief medication. The problem is the unintended effects these medications cause in the body. I am not a doctor or a pharmacist, but I tend to rely on my common sense.

Fortunately, nature has always offered us solutions to these very vast and unfortunate problems. **Solutions that, fortunately, are often right under our noses. When it comes to thriving against illness, look no further than your own backyard.** Nature has a way of knowing what we need, and generally we are never faced with problems that have no solution. In fact, solutions to numerous problems can often be found in just one simple place.

This couldn't be more true than with the natural antibiotics you are about to read about in this book. The splendor of nature can't be defined without first examining just how many incredible herbs and natural cures that we have been given, right within arms reach. It's amazing, and should never be overlooked and under-utilized.

But something incredible is happening now. Maybe it can be attributed to the influx of international information that is now readily available through the internet, maybe it can be attributed to the diversity that the United States is now enjoying due to modern immigration, or maybe it is more of a need to simplify. We, in the United States, are more and more connected with other cultures around the world. We are learning that not everyone lives like we do, and that there are many other opinions about health and wellness than what we have learned at home or in our culture
