An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls)

Colin D. MacLeod

An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) Colin D. MacLeod

This is the first supplementary workbook produced to accompany 'An Introduction To Using GIS In Marine Biology' by the same author. It is designed to augment the information on using GIS in marine biology provided in that book, and indeed, to be used alongside it rather than to be used independently as a stand-alone volume.

This second edition has been updated for ArcGIS 10.1 software and it contains five exercises covering the practical use of GIS in marine biology. These exercises are based around mapping species distribution and range from making a simple map of the locations where a species has been recorded to creating grids of species presence-absence, species richness and abundance.

Working through these five exercises will help the novice GIS user obtain experience in working with GIS and so develop their GIS skills. Unlike most other GIS tutorials, this information is specifically presented in a marine biological context and all the exercises use real data from a marine biological study. Therefore, these exercises are more likely to provide the kind of experience in using GIS that marine biologists will find useful and applicable to their own research.

These exercises are presented in the same easy-to-follow flow diagram-based format first introduced in the 'How To...' section of 'An Introduction To Using GIS In Marine Biology'. They are accompanied by images which show the user how their GIS project should look as they progress through the exercises, allowing them to compare their own work to the expected results.

This is part of the PSLS series of books which use Task-Oriented Learning (TOL) to teach the practical application of research skills to the life sciences. This involves demonstrating how these skills can be used in the specific circumstances in which they are likely to be required rather than concentrating on teaching theoretical frameworks or on teaching skills in a generic or abstract manner. By seeing how the similar processes are used to achieve a variety of different goals within a specific field, it becomes easier for the reader to identify the general rules behind the practical application of these processes and, therefore, to transfer them to novel situations they may encounter in the future.

Table Of Contents:

Preface

1. Introduction

2. How To Use The ArcGIS 10.2 Software User Interface .

3. Exercise One: Creating A Map Of Species Distribution For A Publication.

4. Exercise Two: Creating A Presence-Absence Raster Data Layer For A Species From Survey Data.
5. Exercise Three: Creating A Species Richness Raster Data Layer From Survey Data.
6. Exercise Four: Creating A Polygon Grid Data Layer Of Abundance Per Unit Effort From Survey Data.
7. Exercise Five: Creating A Polygon Grid Data Layer Of Species Richness Per Unit Effort From Survey Data.

From reader reviews:

Chad Foster:

The reserve with title An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) possesses a lot of information that you can learn it. You can get a lot of benefit after read this book. This book exist new information the information that exist in this book represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. That book will bring you inside new era of the glowbal growth. You can read the e-book in your smart phone, so you can read the item anywhere you want.

Mary McCollum:

Beside this specific An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) in your phone, it could possibly give you a way to get closer to the new knowledge or details. The information and the knowledge you might got here is fresh from the oven so don't end up being worry if you feel like an outdated people live in narrow community. It is good thing to have An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) because this book offers to you personally readable information. Do you oftentimes have book but you seldom get what it's about. Oh come on, that will not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss that? Find this book in addition to read it from at this point!

James Jernigan:

Is it you actually who having spare time in that case spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) can be the response, oh how comes? The new book you know. You are so out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these books have than the others?

Darren Reid:

Book is one of source of information. We can add our understanding from it. Not only for students but also native or citizen require book to know the change information of year to help year. As we know those ebooks have many advantages. Beside many of us add our knowledge, could also bring us to around the world. From the book An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls) we can have more advantage. Don't someone to be creative people? Being creative person must choose to read a book. Only choose the best book that acceptable with your aim. Don't end up being doubt to change your life by this book An Introduction To Using GIS In Marine Biology: Supplementary Workbook One: Creating Maps Of Species Distribution (Psls). You can more desirable than now.
