Urban Geography (Routledge Contemporary Human Geography Series) Tim Hall, Heather Barrett

This extensively revised and updated fourth edition not only examines the new geographical patterns forming within and between cities, but also investigates the way geographers have sought to make sense of this urban transformation. It is structured into three sections: 'contexts', 'themes' and 'issues' that move students from a foundation in urban geography through its major themes to contemporary and pressing issues. The text critically synthesizes key literatures in the following areas:

- the urban world
- changing approaches to urban geography
- urban form and structure
- economy and the city
- urban politics
- planning, regeneration and urban policy
- cities and culture
- architecture and urban landscapes
- images of the city
- experiencing the city
- housing and residential segregation
- transport and mobility in cities
- sustainability and the city.

The fourth edition combines the topicality and accessibility of previous editions with extensive new material, including many new chapters such as the urban world and politics, housing and Residential Segregation, and transport in cities, as well as a wealth of international case studies, extending its range of coverage across the field. This book features enhanced pedagogy including a range of new illustrations and tables, a list of key ideas for each chapter, end of chapter essay questions and project activities, and annotated further reading from books, journals and websites. Written in an engaging, student friendly style, this is an essential read for students and scholars of Urban Geography.
